

Velocita Wireless Closes Agreement to purchase SkyTel from Bell Industries

Sweden, June 16, 2008 – Velocita Wireless, LLC, a wholly-owned subsidiary of United Wireless Holdings, Inc. and a leading supplier of wireless network data services for machine-to-machine (M2M) solutions, announced today the close of its agreement with Bell Industries to purchase SkyTel.

The acquisition boosts United Wireless Holdings' annual revenues to over \$100 million and the combination of assets, revenues and organizations will confirm Velocita's position as a leader in the industry.

"These two pioneering wireless data companies are a natural fit", said Mark Hull, CEO of Velocita Wireless. "This acquisition clearly benefits all of our customers as together we are an even stronger company with a long-term commitment to messaging, data and the M2M market."

About Velocita Wireless, LLC

With its headquarters in Woodbridge, NJ, Velocita Wireless is a national wireless network operator focused on the M2M market. It is a subsidiary of United Wireless Holdings, Inc., which purchased the company from Sprint Nextel in June 2007. The company offers wireless data M2M products including automatic vehicle location (AVL), telematics, point-of-sale, security and energy solutions to enterprise and government customers. Its network operates in 50 states covering 93 percent of all U.S. businesses and 220 million people.
